

Agile Testing Process “Continuous Integration”

- User needs designed & developed **one-at-a-time**
- Changes **automatically detected**, built, and tested
- ☞ □ **System fully tested and deployed** as changes occur

Early, Automated, Fast, Efficient, & Repeatable

Thousands of Tests Continuously Executed

Lean, Waste Free, Low WIP, No Deadlocked Test Queues

Constant Readiness State & CM Control

No More Late Big Bang Integration

Rapidly & Successfully Dev. Complex Systems
